

SMARTTOUCH Controls with Industry 4.0 Communications

System features

- OPC-UA open platform for Industry 4.0 capability
- Available WIFI gateway lets you connect the dryer to your network wirelessly without compromising your in house network

Energy efficient

- True on demand based regeneration provides the most energy efficient design over wheel dryers (up to 50%)
- Multiple Thermocouples provide precise temperature control for spike free bed shifts

Loading control

- Controls for hopper and press loading are easy to set for fill times, dump times and alarms – no need to scroll through endless screens to find the information you need!
- Powerful, Expandable PLC ready for future expansion

Standard on our HP series dryers, dual hopper dryers and optional on our 2 bed, Arid-X dryers. The SmartTouch controller features a 7" color touch screen with easy to use prompts for temperature, time and dewpoint display.

Other features include:

- -49° F dewpoint monitor
- 7 day timer for automatic start and stops
- Diagnostic functions with trending for temperatures and dewpoint
- Resin Library – build your own resin library for quick set ups
- OPC-UA open platform for maximum connectivity
- Available WIFI Connectivity – cut the cord! And use WIFI to transmit dryer information to a host computer
- Available Ethernet connectivity Hub
