Desktop App Controls multiple dryers without walking the plant floor

Available with our SmartTouch controlled dryers, the SmartView Desktop App puts you in control of your dryers from one central location. Communication can be set up through our optional Ethernet switch or WIFI with our WIFI option.

The App will show you:

- Color coded Dryer status – on (Green), off (White) and (Red) for alarm
- Dewpoint
- Hopper status - on / off set, and actual temperatures on single and dual hopper dryers
- Regeneration status
- Dryer IP address

The App will show you:

- Start and Stop Dryer
- Set hopper temperatures on single and dual hopper portable dryers
- Create names of the individual dryers

App *features*

- The SmartView App is a web based App that connects to your dryers through the dryers unique IP address

- Available WIFI bolt lets you connect the dryers to your network wirelessly without compromising your in house network

- For Ethernet connection you will need: Ethernet Connection kit PN/ 8675309 which includes Desktop software license and Ethernet switch (Ethernet cable by others)

- For connection through WIFI you will need WIFI bolt connection kit PN/ 8675309 Jenny which includes Desktop software license, Ethernet switch & WIFI Bolt
