

MD MicroDryer

Dri-Air's new on the press compressed air dryers are ideal for low throughput applications and micro molding applications. -40°F dewpoints are assured as the MD series includes a membrane and prefilter to remove moisture from your compressed air

Stainless steel and Pyrex glass construction make the MD series ideal for clean rooms and high cost materials. An optional adjustable fill sensor and self loading system lets you adjust the hopper capacity from 1-3 pounds to match your application

MD Flexibility

The MD series is also available with 5 or 15 pound stainless steel hoppers and the dryer can be remote mounted. Dryer operates on 110 or 220 single phase electrics for ease of installation and since it's a compressed air dryer water is never required!

MD Controls

The MD series features a standard 4" color touch screen for easy navigation for temperature and alarm settings including a 7 day timer for automatic start and stops.

Dri-Air's on the press MD Compressed air dryers are the perfect solution for drying material at the press or on the Extruder!

- Available with hoppers from 1 - 15 pound capacity, the MD series are customizable to match your low throughput application – auto loading of the hopper is available for lights out operation
- The MD series is available with options to make the system even more flexible, including:
 - -40°F dewpoint monitor
 - Adjustable fill sensor
 - Integrated compressed air loader for loading the drying hopper
 - Feed throat adapters
 - Remote dryer capabilities

Dri-Air Model	Hopper Capacity	Throughput Pounds/Hour	Overall Dimensions
MD-1	1 - 3 pounds	.15 - 1	5" x 13" x 13"h
MD-2	5 pounds	1 - 2	5" x 16" x 13"h
MD-3	15 pounds	2 - 5	5" x 17" x 18"h
